## CULTIPACKER SERIES

The Double Roller Cultipacker Series is designed for proper seedbed preparation and to help reduce wind and water erosion. The compactions help prevent moisture loss and help assure proper seed germination by forming a firm and level seedbed. The 16" cast iron notched wheels are mounted with 1 1/8" triple sealed ball bearings and are heavy enough to pulverize hard clods. These models come in 8', 10', 12' and 16'. Each size includes hydraulic lift cylinder, hydraulic hoses, tire and rim assembly, clevis type hitch, safety chain and hydraulic cylinder transport lock out. These units consist of two sets of rollers, wheel carriage, leveling assembly, and clevis hitch.

### DCP SERIES

- Designed for 40 to 120 HP tractors
- Heavy duty 4" square tube steel main frames
- Front and Rear roller assemblies
- 16" Cast iron packer wheel
- Heavy duty roller assembly with 1 1/8" ball bearing
