

HYDRAULIC BOX SCRAPER SERIES

Tufline's TB30 and TB40 Series Box Blades are designed for effortless use with maximum durability and versatility. These hydraulic box blades break through tough ground and easily handle a variety of earth-moving jobs.

Make convenient adjustments with the hydraulic scarifier bar from your operators seat. The scarifier is fabricated with heavy-duty welded mast and tubular reinforced steel for durability. The scarifier tips are replaceable and heat treated for longevity.

The large capacity steel box has a dual sided, hinged tailgate to allow for scraping, leveling and backlifting. The hinged tailgate can also be easily converted to a fixed tailgate by a steel toggle bolt. The 3/8" x 6" steel cutting edges are reversible for an extended life.
